SUMMARY

Machine learning engineer and Neural Engineer with hands on experience across the full ML lifecycle — from data pipelines and model development to production deployment. Industry focused, with a track record of shipping models into real products. Particularly drawn to neurotechnology out of personal interest, focusing on EEG, MRI and FNIRS.

EXPERIENCE

BrainsightAI | Bengaluru, India

July 2025 – August 2026

Product Deployment & ML Engineer

April 2026 – August 2026

- Led transition of validated ML models from research pipelines into production, coordinating deployment, monitoring, and release readiness for clinical neuroimaging workflows.
- Partnered with cross functional engineering and clinical teams to translate model performance requirements into deployment ready product features.

Machine Learning Engineer

July 2025 – April 2026

- Enhanced and maintained automated neuroimaging pipelines by optimizing ML algorithms, ensuring data quality, and performing validation across large-scale imaging datasets.
- Refined image processing algorithms for 4D MRI datasets, improving accuracy and computational efficiency.

International Research Intern | Shibaura Institute of Technology | Tokyo, Japan

January 2025 – April 2025

- Conducted research on somatosensory movements and recall mechanisms using EEG signals to decode neural patterns.
- Developed and implemented ML pipelines with real time and session to session transfer learning networks to analyze large EEG datasets for neural response classification.

Machine Learning Intern | SSN College of Engineering | Chennai, India

June 2024 – September 2024

- Built an EEG based system to detect whether students understood online lectures, using signal data collected across multiple subjects.
- Achieved up to 88% classification accuracy, with Random Forest emerging as the best performing model among those evaluated.

Business Analyst Intern | Energy Alternatives India | Chennai, India

December 2023 – January 2024

- Conducted market research and prepared analytical reports to support business strategy and decision making.
- Collaborated with international companies and overseas clients, generating market insights and content to support cross border business initiatives.

EDUCATION

Master's Degree, Graduate School of Engineering - Neural Engineering (In Progress)

2026 – 2028

Shibaura Institute of Technology (SIT) | Tokyo, Japan

- Fully Funded MEXT 2026 Scholar.

Bachelor's majoring in Artificial Intelligence and Data Analytics — CGPA: 9.22/10

2022 – 2025

Hindustan Institute of Technology and Science | Kelambakkam, Chennai

- Awarded 75% scholarship for scoring Rank 5 overall in the HITSCAT entrance exam organized by the University.

Bachelor's majoring in Data Science (Online)

October 2022 – October 2024

Indian Institute of Technology, Madras

CERTIFICATIONS

- Computational Neuroscience | Indian Institute of Technology, Kanpur | 2023
- Soft Skill Development | Indian Institute of Technology, Kanpur | 2023

PATENTS

System for Generating Connectome Informed Spatial Optimization Dataset for Optimising Delivery of Radiotherapy and Ultra-Sound Ablation to Functional Neural Network Areas Including Tracts and Activity

Co-Inventor | Applicant: BrainSight Technology Pvt. Ltd. | Patent application filed, Indian Patent Office — July 2026

- Co-invented a system and method that integrates subject specific brain connectome mapping with radiotherapy and focused ultrasound ablation planning, defining neural networks as volumetric organs-at-risk and automatically applying network specific dosimetric constraints (e.g., hippocampal, brainstem, optic chiasm, cochlear dose limits) to protect functional brain networks during treatment.

PROJECTS

Neural Feedback for Somatosensory Rehabilitation: A Real Time EEG Based Comparison of Visual and Tactile Feedback in Sensory Imagery

Shibaura Institute of Technology, Tokyo

- Developed a real time EEG based neurofeedback system for somatosensory rehabilitation using visual and tactile feedback, decoding left/right hand imagery with CSP and ensemble classifiers.
- Found tactile feedback to be more effective than visual, highlighting the potential of closed loop BCI systems for enhancing neuroplasticity in neurorehabilitation.

Brainwave Controlled UAVs: EEG Based Mind Machine Interaction

Hindustan Institute of Technology and Science

- Explored hands free drone control using EEG signals, integrating EEG and BCI technology.
- Processed EEG data with ML (SVM, Random Forest) and DL (ANN) models, evaluating performance based on accuracy, sensitivity, specificity, precision, and F1 score.

Analysis of EEG Signals for Emotion Detection

SSN College of Engineering

- Analyzed EEG data from educational recordings to assess student understanding for customized lectures.
- Applied preprocessing techniques and implemented ML and DL algorithms, achieving significant results in understanding assessment.

SKILLS

Programming Languages: Python, R, MATLAB

Deep Learning: TensorFlow, PyTorch, Keras, CNN, Transfer Learning, Sequence Models (RNN/LSTM)

Machine Learning & MLOps: Scikit-learn, Feature Engineering, Model Validation & Tuning, Production Deployment, Model Monitoring (classical ML: SVM, Random Forest, Gradient Boosting/XGBoost)

EEG & Neuroimaging Tools: EEGLAB, Nibabel, Nilearn, FSL, MRtrix, AFNI

Medical Imaging Formats: DICOM, NIfTI, 4D MRI Processing

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes

Languages: English, Tamil, Japanese (JLPT N5 — Elementary)

Research Skills: Institutional Research, Research Projects, Research Support, Project Management

Other Industry Knowledge: Content Development, Market Research, Market Analysis, HR Consulting, Web Content Writing

INVOLVEMENT

- OGMA Advisor | Hindustan University | Athena Literary Society | October 2022 – May 2025
- OC Content | Hindustan University | Model United Nations (HITSMUN) Club | July 2024 – May 2025
